## OUR VISION

To be a premier professional service provider for our stakeholders whilst achieving global professional and ethical standards.

## OUR MISSION

To provide top-notch care to our clients by delivering the services with supreme quality within intended time frame. To involve the best professional resources based on the stakeholder's requirement to guide our resources toward development through training and other means.

### FULFILLING THE SCOPE – ON TIME, TO PERFECTION AND WITHIN BUDGET.

Servespins is a leading Quantity Surveying Consultancy firm founded in 2018 to serve clients, consultants and contractors across the globe. With our headquarters based in Sri Lanka – a country renowned for its rich Quantity Surveying tradition – we have established ourselves as a top brand in the global construction scene through the provision of high-quality services at reasonable rates.

We operate with the goal of never falling short of our clients' expectations while adhering to the values and best practices advocated by Professional Bodies and Chartered Institutes of the industry.

# SERVESPINS' CORE VALUES & APPROACHES

- Maintain a respectful and progressive business environment.
- Meet the evolving needs and desires of clients and stakeholders.
- Practice highest ethical and professional standards.
- Focus on innovative.

## **Approaches** **Values**

- Top-notch Client Care
- Integration of latest technologies in to the business  
Periodical QA/QC policy.
- Constant Training & Development.
- Best ethical and professional practices.

# SERVICES

In order to effectively meet every single need of our clients, we have carefully customized our services instead of mass-producing solutions based off regular templates.

We work closely with our clients to determine which solution or combination of solutions is best suited to achieve their goals.

- Review & Certification of monthly Interim bills Value Engineering.
- Sustainability Advise.
- Preparation & Assessment of the Final Accounts Valuation of Variations.
- Monthly Financial Reporting to Client Budget Reconciliation reports.

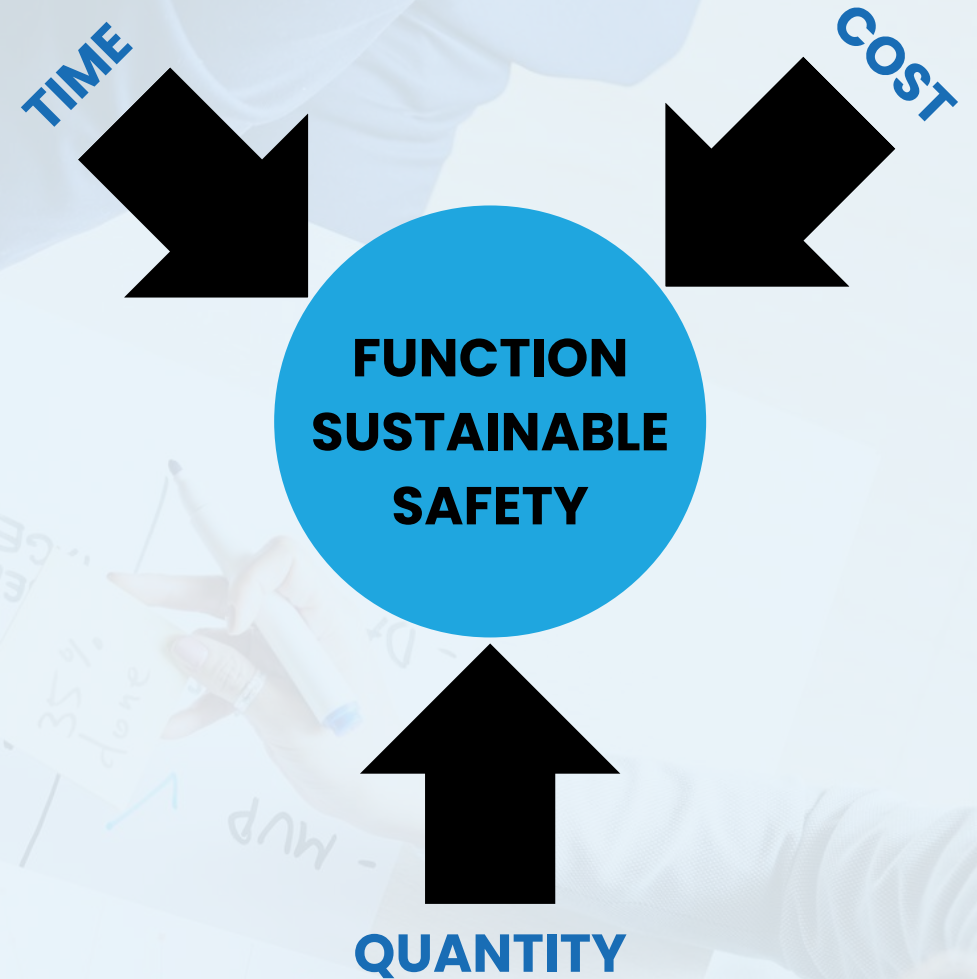

## PROJECT MANAGEMENT

DIRECTION, REGULATION, AND SUPERVISION OF YOUR PROJECT FROM EARLY DEVELOPMENT TO COMPLETION.

Our goal is to completely fulfill all of your demands for a feasible project both in terms of functionality and budget through comprehensive Construction Project Management.

Construction projects tend to have an unceasing need for adjustments. Therefore, project management plays an important part when it comes to stabilizing the whole procedure. Successful project management is a combination of a variety of professional skills and competences. We have working with us seasoned veterans and rising stars of the industry from different backgrounds, covering all aspects of a construction project.

Servespins provides Construction and Procurement Advice, Planning and Programming, Site Management, Quality Management, Commercial Management (contractor and supplier payments etc.), and more.

## CONTRACT & CLAIM MANAGEMENT

### MASTERFUL GUIDANCE FROM SEASONED EXPERTS

We identify, analyze, prevent and solve issues and events that lead to claims, through a healthy Contract and Claim Management process. Cultivated throughout our years of experience in construction, our processes have been fine-tuned and made flexible to cater to disputes, litigations and arbitrations that tend to be unique to each project, client and circumstance.

A construction project consists of a lot of moving parts, both literally and metaphorically. Regardless of how perfect it looks on paper, things take unexpected turns more often than not, when it comes practical circumstance. Therefore, competent claim avoidance or claim resolution can save you a lot of trouble. Well versed in widely used claim management protocol published by relevant world bodies, we expertly navigate you to the best possible outcome.

## SERVICES INCLUDES

Contract Drafting, Review and  
Quantum Analysis

Advice on Insurances, Bonds &  
Parent Company Guarantees

Claim Management and  
independent advice on Right &  
Obligation of the parties

Extension of Time, Disruption,  
Prolongation & other claims  
Preparation, Review and  
evaluation

## DISPUTE RESOLUTION

Our team brings decades of experience to the dispute resolution process along with our trademark logical and commercial approach to issues.

### We provide

- Advice on dispute resolution (negotiation, adjudication, arbitration etc.)
- Claim Management and independent advice on Right and Obligation of the parties Party Representation in Arbitration proceeding (preparation statement of claim, Statement of Defense, Reply to Statement of Defense etc.)
- Advise on applicable law of arbitration and substantive and procedural matters.

## INDEPENDENT EXPERT DETERMINATION/ WITNESS

### INDEPENDENT EXPERT DETERMINATION/ WITNESS

Disputes on construction projects usually has to do with cost. Every miniscule detail of the matter must be analyzed by an impartial third party with an expertise in construction components, costs and contracts.

Our experts provide Independent Expert Determination/witness report on issue(s) in disputes.

## BUILDING INFORMATION MODELING(BIM)

Building Information Modeling (BIM) is the process of generating and managing building data during its life cycle. BIM uses three-dimensional, real-time, dynamic building modeling software to increase productivity in building design and construction.

BIM is a process in which different actors work together, efficiently exchange information (data and geometry) and collaborate to provide a more efficient construction process (e.g., less errors, faster construction) but also more efficient buildings that produce less waste and are cheaper but also easier to operate. With that vision the key is not the three dimensional modelling itself but the information developed, managed and shared, in support of better collaboration.

From our experience other Project Management and Quantity Surveying firms tend to isolate themselves from the design team.

This is where we are fundamentally different. Servespins form part of your team and deliver leadership where and when required to achieve project results.

Servespins is positioned primarily in the areas of design, BIM Consulting and Research / Development of BIM tools.

## SERVICES INCLUDES

- Project Detailing and Drafting
- Shop drawings
- Integrated BIM Modeling Services and "Integrated Project Delivery" - IPD; (Via Autodesk BIM360)
- Project Review and incompatibility analysis from BIM 3D modeling
- Checking for Errors and Omissions from BIM 3D modeling
- Planning Studies and Constructive Phasing from BIM 4D modeling
- "As Built" modelling integrated with Building and Equipment Management
- Strategic Planning to BIM Consulting and Implementation
- BIM Tools and Process Development
